ANKUSH PANDEY

Cloud & DevOps Engineer
Indore, Madhya Pradesh, India | +91 9424017449 | pandeyankush8959@gmail.com
Portfolio: https://ankush.fun | LinkedIn: www.linkedin.com/in/ankush-pandey-658824401 | GitHub: www.github.com/Ankush-97

PROFESSIONAL SUMMARY

Cloud and DevOps Engineer with hands-on experience building, automating, and scaling AWS cloud infrastructure and containerized microservices. Proficient in Infrastructure as Code (IaC) using **Terraform**, container orchestration with **Kubernetes (EKS)**, and designing robust **Jenkins** CI/CD pipelines. Skilled in developing **Python-based AWS Lambda** serverless workflows and automating system operations. Strong background in building high-availability architectures with Multi-AZ subnets, Application Load Balancers (ALB), and Auto Scaling. NPTEL Certified Cloud Computing professional (Elite + Silver, 84% score from IIT Kharagpur) with strong foundations in scalable architectures and virtualization. **Based in Indore and available immediately to drive operational excellence.**

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, VPC, S3, RDS, EFS, CloudFront, Route 53, IAM, ACM, SES), Microsoft Azure, GCP
- **Containers & Orchestration:** Kubernetes (K8s), AWS EKS, Docker, Docker Compose, Docker Hub
- **Infrastructure as Code (IaC):** Terraform (Reusable Modules, State Management, Provisioning)
- **CI/CD & Automation:** Jenkins (Master-Worker Architecture, Multi-stage Pipelines), GitHub Actions
- **Scripting & Code Quality:** Python (AWS Lambda), Bash/Shell Scripting, SonarQube Quality Gates
- **Networking & Security:** Multi-AZ Subnets, ALB, ASG, NAT Gateway, Security Groups
- **Databases & Build Tools:** MySQL, MariaDB, MongoDB, Git, GitHub, Maven, npm

PROFESSIONAL EXPERIENCE

DevOps Engineer Intern | Hisan Labs Private Limited | Mar 2026 – Present

- Designed and deployed a containerized three-tier microservices application on AWS EC2, using Docker bridge networking for service communication and MariaDB for data storage.
- Configured GitHub webhooks to trigger automated build and deployment workflows on every code commit, ensuring rapid feedback loops for the development team.
- Provisioned AWS VPC infrastructure with modular Terraform, including Multi-AZ subnets, Application Load Balancers (ALB), and Auto Scaling Groups (ASG) to support high availability and scalability.
- Built optimized Dockerfiles using efficient base images, including eclipse-temurin, reducing container image footprint by 40%.
- Implemented event-driven AWS Lambda workflows for database snapshot triggers, log rotation, and S3 object-event processing.
- Configured Kubernetes Horizontal Pod Auto-scaler (HPA) to handle traffic fluctuations and implemented rolling update strategies to ensure high availability and zero-downtime releases.
- Built multi-stage Jenkins CI/CD pipelines using a Master-Worker architecture and integrated SonarQube Quality Gates for static analysis and code-quality checks.
- Established monitoring with Datadog & CloudWatch dashboards and Bash automation for log management and host operations.

PROJECTS

AWS Serverless Portfolio Infrastructure & CI/CD Pipeline | Live Portfolio GitHub Repository

- Hosted a personal portfolio on AWS S3 Static Website Hosting and secured it globally using AWS CloudFront CDN with free ACM SSL/TLS certificates for automatic HTTPS redirection.
- Automated code deployments via GitHub Actions CI/CD to auto-sync files and clear cache on git push, routing form data through API Gateway, AWS Lambda (Python), and Amazon SES.

Production-Grade High-Availability AWS Architecture via Terraform | GitHub Repository

- Automated AWS infrastructure provisioning with reusable Terraform modules, including custom VPCs, Multi-AZ subnets, NAT Gateway, EC2, ALB, and Auto Scaling Groups.
- Configured Nginx web instances to scale with demand; project notes report a 50% reduction in environment setup time and support for traffic spikes up to 3x.

Three-Tier Microservices Application Deployment using Docker Compose & AWS | GitHub Repository

- Deployed a containerized application on AWS EC2 using Docker Compose for Apache, Java 17, and MariaDB services.
- Configured isolated Docker bridge networks for service discovery and AWS Security Groups for controlled cross-tier traffic.

ShopiTry – Microservices E-Commerce Platform | GitHub Repository

- Engineered a 6-service Node.js/AWS microservices app secured with Nginx, Let's Encrypt SSL, and JWT/RBAC access controls.
- Optimized performance and delivery, cutting backend latency by 35%, accelerating frontend asset delivery by 40%, and reducing deployment rollout times by 25%.

CERTIFICATIONS

- **Cloud Computing** (Elite + Silver) | NPTEL, IIT Kharagpur *[Issue Date: Oct 2026]*
  - *Scored 84% consolidated marks with a perfect 25/25 in Online Assignments.*
  - *Learned Cloud Architecture, Resource Management, Containerization, and Serverless/FaaS models under Prof. Soumya Kanti Ghosh.*

EDUCATION

Master of Science in Computer Science (M.Sc. CS Hon's) | Awadhesh Pratap Singh University (APSU), Rewa | 2023 – 2025
Bachelor of Science in Computer Science (B.Sc. CS Hon's) | Awadhesh Pratap Singh University (APSU), Rewa | 2020 – 2023
